News and Updates

New: Quest Tool Version 3.3.0

2017-12-03 10:48

The Quest Tool Version 3.3.0 is available for all Quest Tools released on Dec. 2nd, 2017!

All our available assessment tools (SPiCE, CMMI and others) have been updated!

Version 3.3.0 is 100% backward compatible to our previous releases, version 3.2.x and also to 3.0.3 (without Advanced Practices).

Starting with Software Version 3.3.0 there is a build-in Rule-Checker for the SPiCE 1-2-1 for Automotive PAM 3.x tool, which can trigger errors and warnings when you check the consistency of your ratings according to a guideline. All rules are checked, which are free of contextual information and rely only on the givien PA/BP/GP rating.

A new feature 'bested' reporting templates' for Word allows to design complex reports with less effort.
