Related Tools

Besides MyBusinessQuest there is a whole series of tools which touch the same topic directly or from a slight different viewpoint. Each of these methods does have its own advantages. The selection of the assessment method and tool should take your business needs and goals into consideration. Contact us, we are glad to help you.

SPiCE 1-2-1 for International Standard - following ISO 15504:2003/2006/2012 on a one-to-one basis (hence the name).
See here for more information:
www.spice121.com

Additional to the International Standard, there is a version for the automotive industry: AutomotiveSPiCE. See here for more information: www.spice12drive.com

SPiCE 1-2-1 for ISO 20000 - Processes for IT-Servicemanagement (ITSM).
See here for more information:
www.spice4iso20000.com

SPiCE 1-2-1 for ISO 27000 - Processes for Information Security Management System (ISMS).
See here for more information:
www.spice4iso27000.com

If you have a small software development organisation, then SPICE might be oversized. Or if you just start to explore the world of processes, then use the assessment tool SPiCE-Lite.
It contains also a mapping to display the results in ISO 15504 compliant form.
